Program Outcomes

The program outcomes of Electronics and Communication Engineering department are articulated in accordance with the NBA attributes and are as follows:

a. Ability to apply knowledge of engineering mathematics, basic science, engineering and programming.

b. Ability to identify, formulate and solve Electronic Engineering problems.

c. Ability to design electronics and communication circuits and systems as per the needs and specifications of the hardware and IT industries.

d. Ability to design digital, analog systems.

e. Ability to visualize and work on laboratory and multi-disciplinary tasks.

f. Skills to use modern engineering tools, software and equipment to analyze problems.

g. Able to communicate effectively in both verbal and written form.

h. Understand the impact of engineering solutions in a global, economic, environmental context.

i. Understanding of impact of engineering solutions on the society and also will be aware of contemporary issues.

k. Graduate who can participate and succeed in competitive examinations like GATE, GRE, MAT.

l. Ability to develop a sense of personal, social, safety and moral responsibility.
