

Program Educational Objectives:

- I. To prepare students to excel in postgraduate programs or to succeed in industry/technical profession through global, rigorous education.
- II. To provide students with a solid foundation in mathematical, scientific, Electronics and Communication engineering, interdisciplinary subjects necessary to formulate, solve, and analyze engineering challenges.
- III. To train students with good scientific and engineering breadth so as to comprehend, analyze, design and create novel products and solutions for the real life problems.
- IV. To inculcate in students professional and ethical attitudes, academic environment, aware of excellence, effective communication skills, leadership and managerial skills, written ethical codes and guidelines and the lifelong learning needed for a successful professional career.
- V. To strengthen the knowledge of students in multi-disciplinary areas of engineering. To provide student with research attitudes to meet the societal needs
