| 5       | National Technology Day<br>(In collaboration with CS dept.)      | 14 May 2022  |
| 6       | Tech Talk with Prof. Dinesh Mehta<br>(Collaboration with BIMSIT) | 4 June 2022  |
| 7       | Mind-hog   | 10 Jan 2022  |

## Environmental day

World environment day is an annual event that is celebrated on June 5th to raise awareness about environmental issues and encourage people to take action to protect the planet. One way to do this is by planting trees, which has numerous benefits for the environment.

Due to modernization, industrialization and increasing use of technology, the environment has been adversely affected.

All the students of ai-ml department took part in planting the trees as an initiative on this day in the BEC campus. This programme was done in order to understand importance of nature.

## Freshers' day

Fresher's day is a gesture of extending the friendly atmosphere and to be motivating factors for juniors.

In this event all the students had an opportunity to communicate and get to know about each other. They also learnt about college rules and regulations, history and culture. The students also took part in icebreaker activities, games, and competitions that help new students interact with each other and feel more comfortable.

## Open day

The open day began with an introduction and overview of the AIML branch, presented by the students, faculty and staff. It was included with a presentation on the college's history, programs, and facilities related to AI and Machine Learning.

Overall, the attendees of open day had an excellent way to learn about the college's programs, facilities, and research opportunities in AI and Machine Learning. They also explored the campus, interacted with faculty and students, and gained valuable information about the admissions process specific to the AIML programs.

## Ethnic day

Ethnic day is a special event that is organized by many colleges and universities to celebrate the cultural diversity and heritage of their students. The day is usually marked by a colorful display of traditional clothing, music, dance, food, and other cultural artifacts.

The purpose of conducting this event is to encourage students to embrace and celebrate their cultural roots, and to appreciate the diverse cultural heritage of their peers.

It provides an opportunity for students to showcase their unique cultural identities, and for others to learn about different cultures and traditions.

## Visit to orphanage

A visit to an orphanage can be a truly heartwarming and fulfilling experience. As we entered the facility, the children's faces lightened up with excitement and anticipation. They may eagerly rush up to greet us with smiles and handshakes.

We were shown around the orphanage by a staff member, who explained the daily routines and activities of the children. We saw the dormitories, classrooms, play areas, and dining halls. We were also introduced to some of the children and staff members, and had the opportunity to chat with them and learn more about their lives.

During our visit, we participated in various activities with the children, such as games, dance, music, and sports. We had carried some gifts and other items to donate to the orphanage. As we spent time with the children, we were struck by their resilience, creativity, and optimism, despite the challenges they have faced in their lives. We were also touched by their warmth, affection, and gratitude, as they expressed their appreciation for our visit and support.

At the end of our visit, we felt a deep sense of satisfaction and joy, knowing that we have made a positive impact on the lives of these children. We also feel inspired to continue volunteering, donating, or advocating for orphanages and other vulnerable populations in your community and beyond.

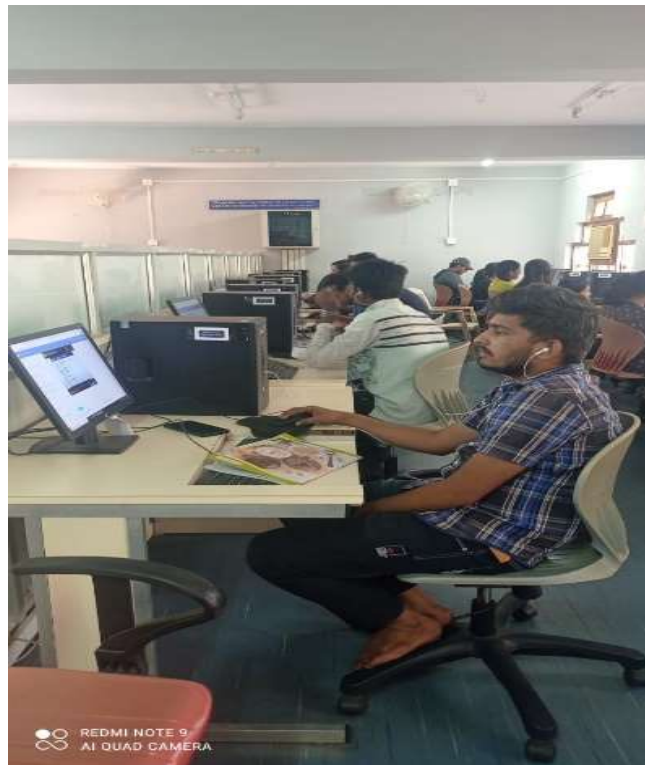

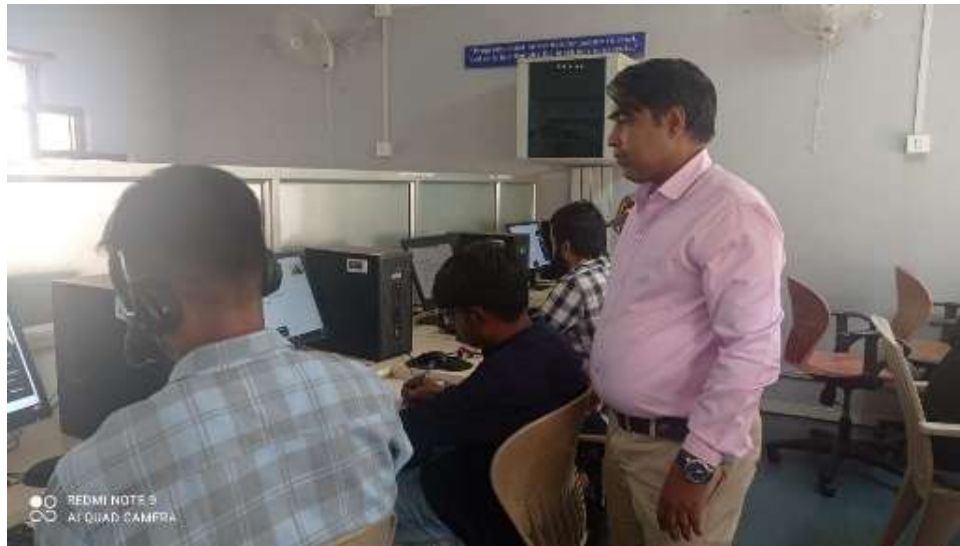

## Python workshop

Python is a popular programming language used for a wide range of applications, including web development, data analysis, artificial intelligence, machine learning, and more. A python workshop for college students can be an excellent opportunity for them to learn this valuable skill and prepare for future career opportunities.

A three-day python workshop was conducted at the beginning of the semester for all the students from morning to evening

Through online sessions. The teachers accompanied us so as to overcome our difficulties in any of our sessions. This was a fruitful workshop where all the students were able to learn basics of python which has a vast application in the field of AIML.

## Expert Talks in collaboration with BMSIT College

## Industrial visit

Visit to the sugarcane industry was an interesting and educational experience, providing insight into the complex process of sugar production from sugarcane.
