

# **BASAVESHWAR ENGINEERING COLLEGE (AUTONOMOUS)**

[Government Aided Institution and Permanently Affiliated to Visvesvaraya Technological University, Belagavi ]

**Bagalkot, Karnataka**

## **Career in Artificial Intelligence and Machine Learning (AI & ML )**

# Contents

- 01 Introduction to AI & ML
- 02 Career in AI & ML
- 03 Start ups to drive growth of AI & ML
- 04 Skills for success in AI & ML
- 05 Conclusions

# I . Introduction to AI

- AI is a branch of Science and assist machines to find solutions to complex problems in a more **human-like fashion**.
- Artificial Intelligence is the future of **Next Generation Technology**.
- It encompasses variety of disciplines like **Medical, Finance, Engineering**.

**SUNDAR PICHAI**  
CEO, Google

AI is the main tool behind new-age innovation and discoveries like driverless cars or disease detecting algorithm

**BARACK OBAMA**  
Former President, USA

Generalized AI is worth thinking about because it stretches our imaginations and it gets us to think about our core values and issues of choice

**ELON MUSK**  
Founder & CEO, Tesla, SpaceX

Artificial Intelligence will be 'vastly smarter' than any human and would overtake us by 2025.

**JEFF BEZOS**  
Founder & CEO, Amazon

We are now solving problems with machine learning and AI that were...in the realm of science fiction for the last several decades

# Artificial Intelligence and Machine Learning

**Artificial Intelligence**

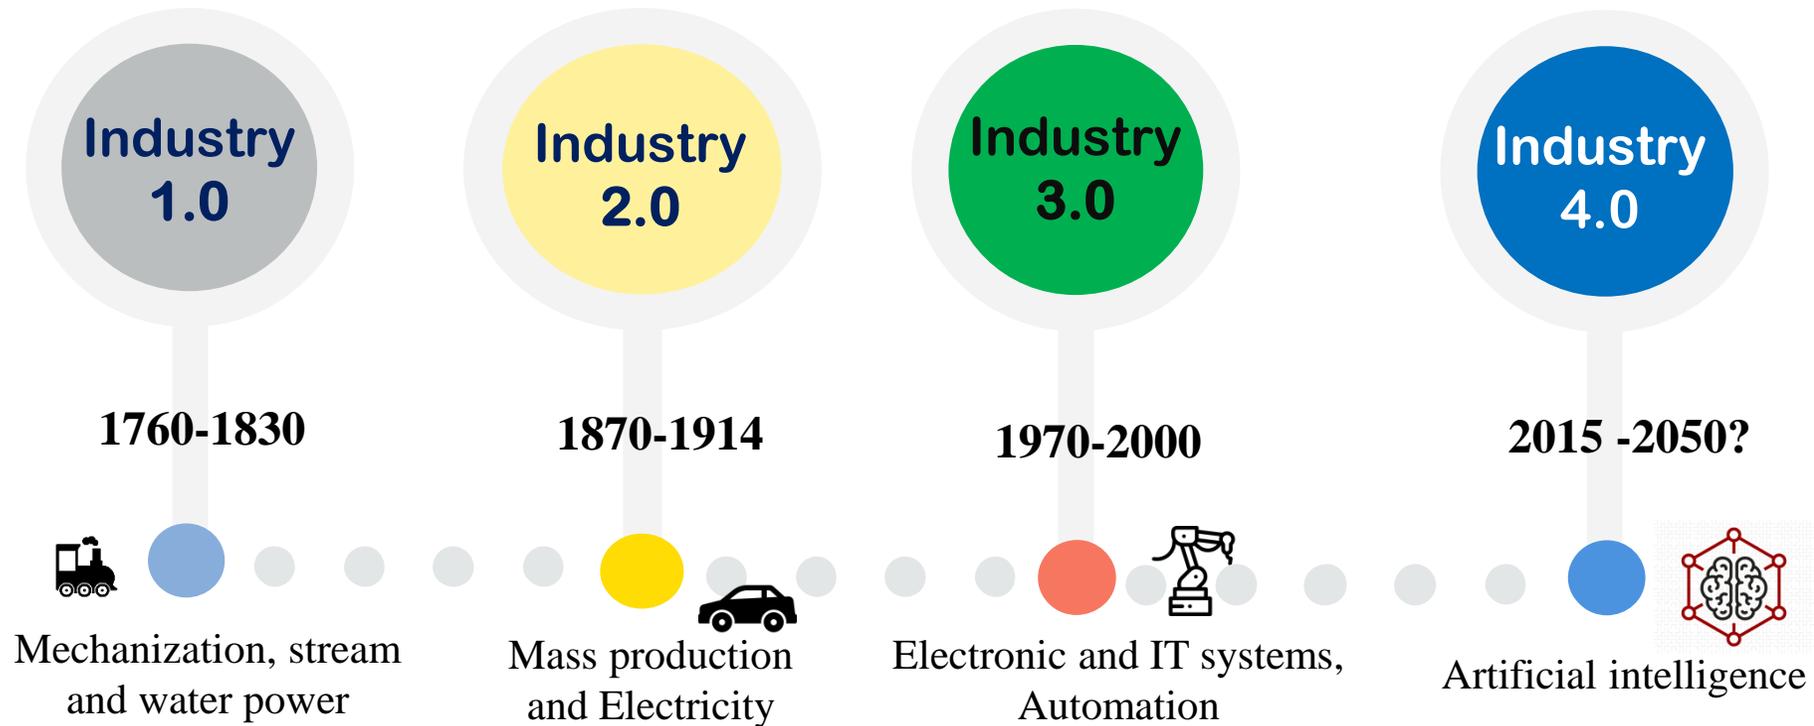

AI is trained final output machine which mimic like human brain  
Ex: Amazon Alexa

**Machine Learning**

ML is a subset of AI. It is a technique to achieve AI. Ex: Spam Detection

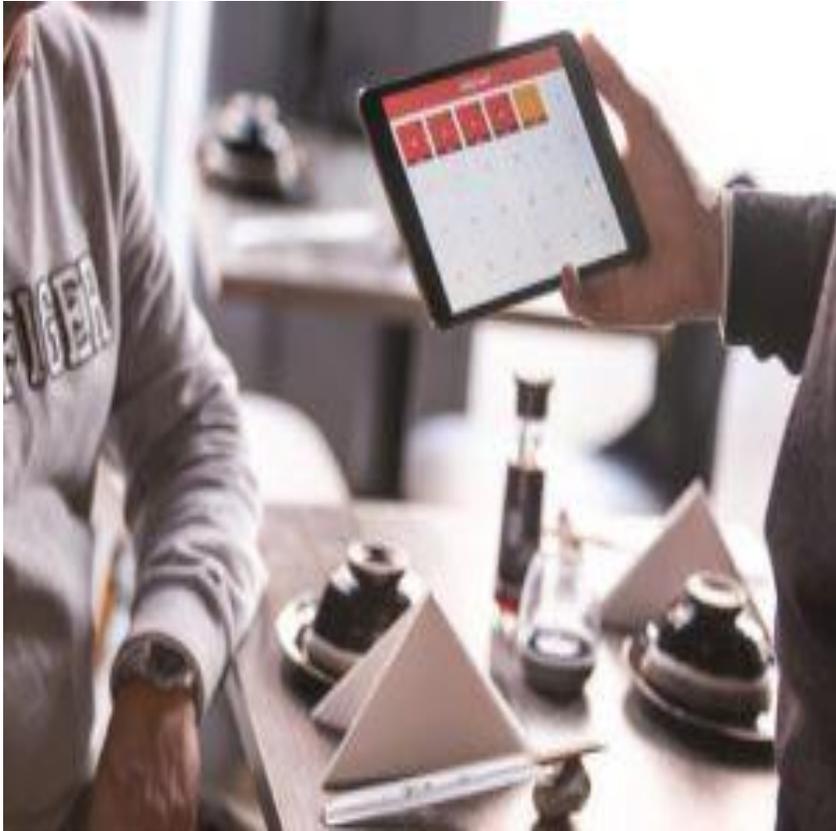

# Artificial Intelligence and Machine Learning in Industry 4.0

Breakdowns of industrial development and the great changes in related categories

# Applications of AI & ML

## 1. Automated Customer Support

- Online shopping experience has been greatly enhanced by **chatbots** because of the following reasons:
  - They **increase user retention** by sending reminders and notifications
  - They offer **instant answers** compared to human assistants, thus reducing response time
  - Chatbots provide upselling opportunities through **personalized approach**

## 2. Personalized Shopping Experience

- Implementation of artificial intelligence makes it possible for online stores to use the smallest piece of data about every followed link or hover to **personalize your experience** on a deeper level.
- This personalization results into **timely alerts, messages, visuals** that should be particularly interesting to you, and dynamic content that modifies according to users' demand and supply.

## 3. Healthcare

- **AI-enabled workflow assistants** are aiding doctors free up their schedules, reducing time and cost by streamlining processes and opening up new avenues for the industry.
- In addition, **AI-powered technology** helps pathologists in analyzing tissue samples and thus, in turn, making more accurate diagnosis.

## 4. Finance

- **Automated advisors** powered by AI, are capable of predicting the best portfolio or stock based on preferences by scanning the market data.
- **Actionable reports** based on relevant **financial data** is also being generated by scanning millions of key data points, thus saving analysts numerous hours of work.

## 5. Smart Cars and Drones

- With **autonomous vehicles** running on the roads and **autonomous drones** delivering the shipments, a significant amount of transportation and service related issues can be resolved faster and more effectively.

## 6. Travel and Navigation

---

---

---

- With **AI-enabled mapping**, it scans road information and utilizes algorithms to identify the optimal route to take, be it in a bike, car, bus, train, or on foot.

## 7. Social media

- Face book uses **advanced machine learning** to do everything from serving content to you and to recognize your face in photos to target users with advertising.
- Instagram (owned by Facebook) uses AI to **identify visuals**.
- LinkedIn uses AI to **offer job recommendations**, suggest people you might **like to connect with**, and serving you specific posts in your feed.

## 8. Smart Home Devices

- The **connected devices of smart homes** provide the data and the AI learns from that data to perform certain tasks without human intervention.

## 9. Creative Arts

- **AI-powered technologies** can help musicians create new themes.

## 10. Security and Surveillance

---

---

---

- AI is making possible for humans to **constantly monitor multiple channels** with feeds coming in from a huge number of cameras at the same time.

## Sophia is a first AI humanoid robot developed by Hong Kong-based company Hanson Robotics

Sophia introduced herself and spoke to the students appearing for their exams.

**YouTube Link :**

<https://www.youtube.com/watch?v=WATLfjRHySU>

India welcomes Robot Sophia for the first-ever interactive session in Kolkata

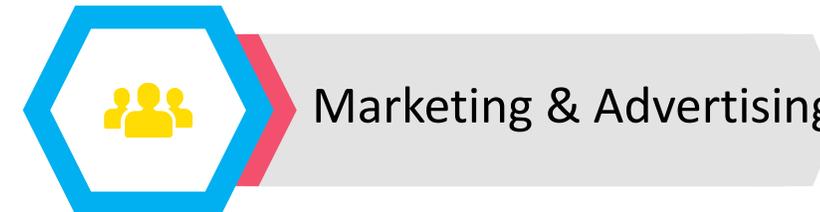

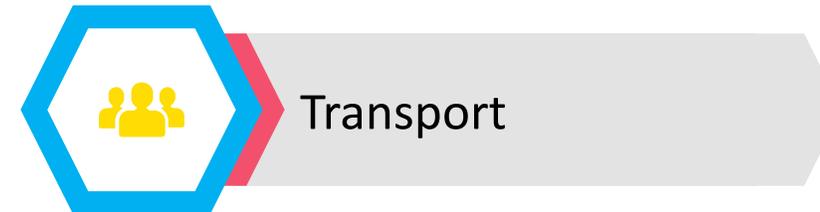

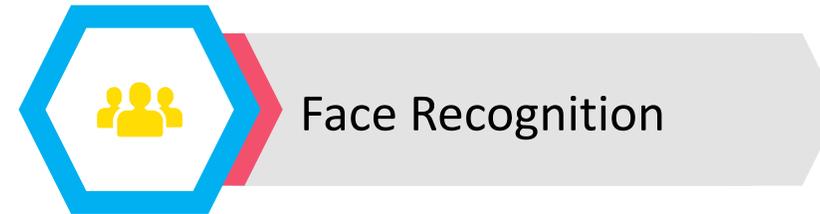

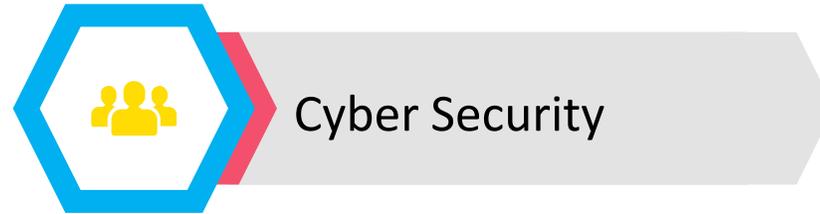

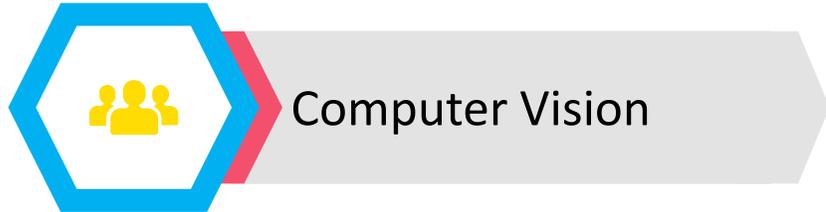

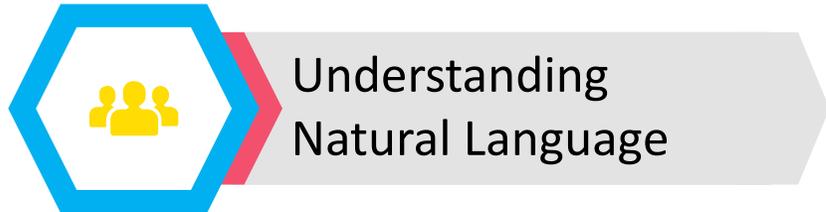

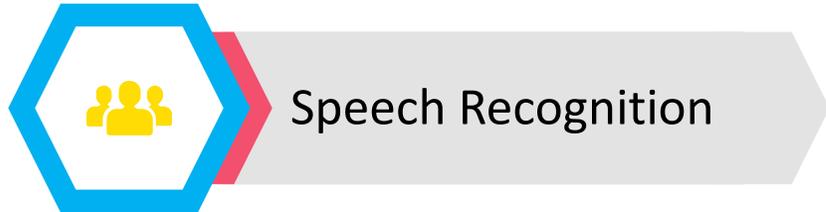

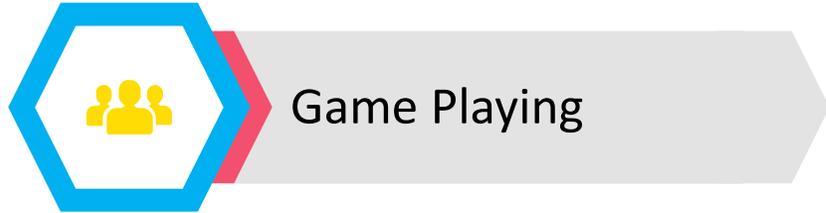

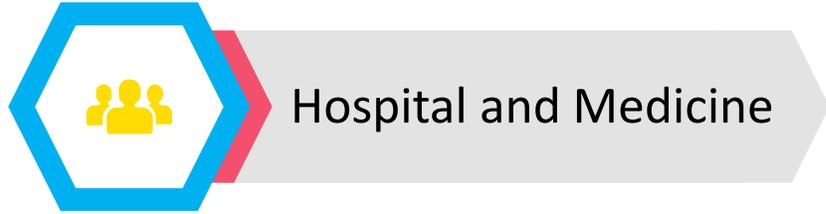

## II. Career in AI & ML

- There is a scope in **developing the machines** in game playing, Speech recognition, language detection machine, computer vision, expert systems, robotics, and many more
- As per International Data Corporation (IDC) Worldwide AI Guide, **spending on AI systems will accelerate** over the next several years as organizations deploy AI as part of their digital transformation efforts & to remain competitive in the digital economy
- Global spending on AI is forecast to **double over the next 4 years**, \$50.1 billion in 2020 to more than \$110 billion in 2024.

# Avenues

# Avenues

India

# AI

Abroad

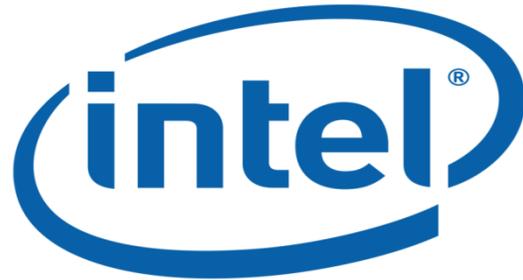

- AI covers many areas like medical diagnosis, stock trading, robot control, scientific discovery.
- If you have the B.E / M. Tech degree in AI and ML, you have the job opportunities in ISRO.
- You also have option to go in various top level microchip manufacturer companies like Intel.
- Indian institute of Biology offers research in AI and robotics
- Some AI job includes machine learning engineer, data scientist, business intelligence developer, research Scientists, and AI engineer.
- Intel offers job for AI and Robotics specialist.
- NASA is the best place to get job in AI in space science.
- US tech companies are prepared to spend over \$1 billion by 2020 in the process of poaching AI talent from wherever they can get it.
- UK's demand for AI skills has been growing much faster than that in the US, Canada and Australia.

**World's biggest companies heavily relying on AI & ML**

Google Cloud Platform

**clarifai**

**pymetrics**

**tamr**

**flatiron**

**defined crowd**

**V I S E N Z E**

Simplifying the Visual Web

### III. AI & ML to drive growth of Start ups

---

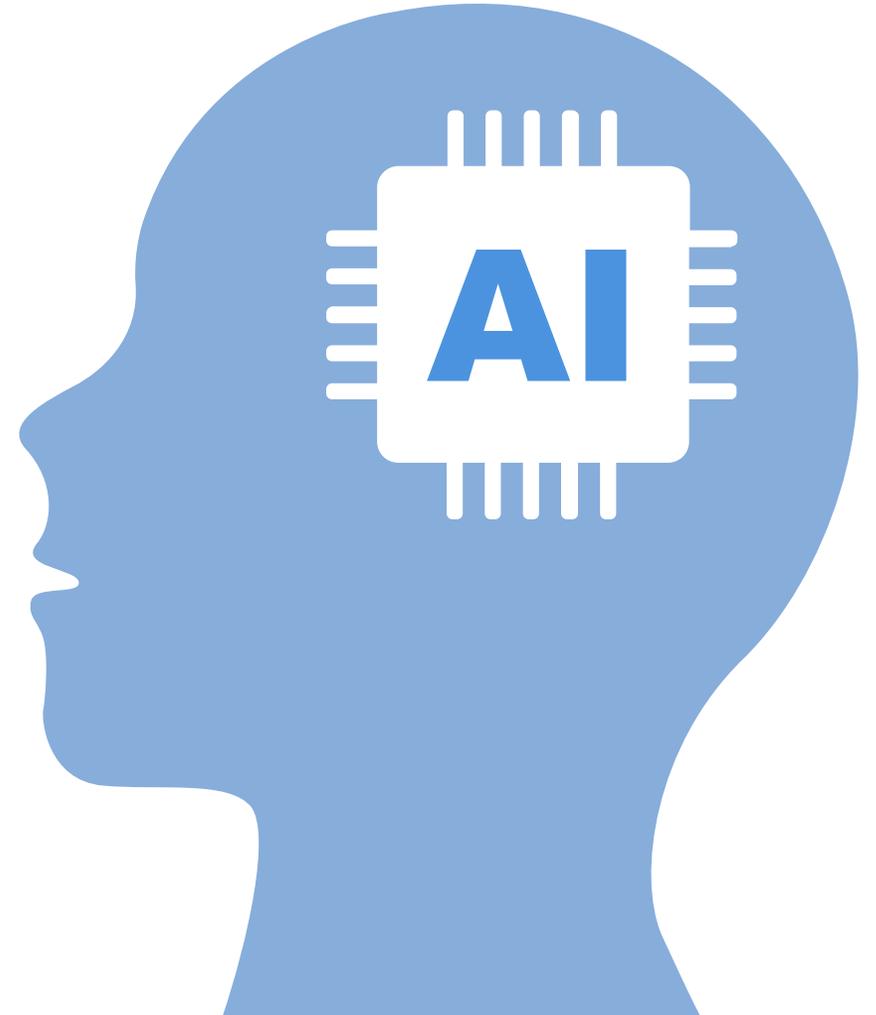

- **Startups ecosystem**, has been nourished with the advent of technology, and has given rise to more evolved business processes.
- These days **Logistics, accounts, marketing and team performance & HR** have all been supported by AI technology.

- With the rising technologies like AI, IoT and ML, its interesting to watch the **changing face of Indian SMEs and startups**.

## IV. Skills for success in AI & ML

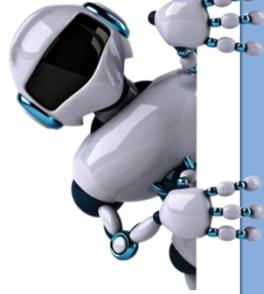

- Working with AI requires an **analytical thought process** and the ability to solve problems with cost effective and efficient solutions.
- Professionals need **technical skills** to design, maintain and repair technology and software programs.
- Those interested in becoming AI professionals need a **education qualification** based on foundations of maths, technology, logic and engineering prospective.
- **Cognitive Science** skills.

# Draft Scheme of Syllabus (2020-21)

## 1<sup>st</sup> Semester

- Engineering Mathematics – I
- Engineering Physics
- Elements of Mechanical Engineering
- Basic Electrical Engineering
- Programming with C
- Constitution of India
- Engineering Physics Laboratory
- C Programming Laboratory

## 2<sup>nd</sup> Semester

- Engineering Mathematics – II
- Engineering Chemistry
- Basic Electronics
- Engineering Mechanics
- Environmental Studies
- Computer Aided Engineering Graphics
- Engineering Chemistry Laboratory
- Basic Engineering Laboratory
- English for Engineers

## 3<sup>rd</sup> Semester

- Computational Methods in Computer Science
- Data Structures and Applications
- Digital Electronics and Microcontroller
- Computer Organization
- Discrete Mathematical Structures
- Introduction to Drones and its Applications
- Digital Electronics and Microcontroller Laboratory
- Data Structures Laboratory
- OOPS with Java Laboratory
- Environmental Studies
- Bridge Course Maths –I

## 4<sup>th</sup> Semester

- Statistics and Probability Theory
- Design and Analysis of Algorithms
- Operating Systems
- Introduction to AI and ML
- Software Engineering Approach using Agile Technology
- Computer Networks
- Design and Analysis of Algorithms Laboratory
- Project Based Learning
- Fundamentals of Quantitative Aptitude and Soft Skills
- Bridge Course Maths –II
- Constitution of India
- Vyavaharika Kannada (Kannada for communication)  
/Aadalitha Kannada (Kannada for Administration)

# Draft Scheme of Syllabus (2020-21)

## 5<sup>th</sup> Semester

- Management and Entrepreneurship for IT Industry
- Automata Languages and Artificial Intelligence
- Professional Elective - I
- Machine Learning with Python
- Open Elective - I
- Database Management Systems
- AI and Machine Learning with Python Laboratory
- Database Laboratory
- Fundamentals of Quantitative Aptitude and Soft Skills

### Professional Elective-I

1. Introduction to Data Science
2. Statistical Inference / Stochastic Processes
3. Principles of Cryptography

### Open Elective-I

1. Data Science
2. Machine Learning using Python
3. Embedded Programming

## 6<sup>th</sup> Semester

- Advanced AI and ML techniques
- Startup and IPR
- Web Applications using Machine Learning Techniques
- Professional Elective –II
- Open Elective – II
- Natural Language and Image Processing Laboratory
- Web Applications Laboratory
- Mini Project

### Professional Elective-II

1. Andriod Application Development
2. Data Mining and Predictive Modeling
3. Digital Image Processing

### Open Elective-II

1. Applications of AI in Industry
2. Software Testing Quality Assurance
3. Internet of Things (IoT)

## 7<sup>th</sup> Semester

- Robotic Process Automation
- Internet of Things with Machine Learning
- Professional Elective – III
- Professional Elective – IV
- Professional Elective – V
- Open Elective – III
- Robotics Automation Laboratory
- Internet of Things Laboratory
- Project Phase – I
- Internship

### Professional Elective-V

1. Neural Networks and Deep Learning
2. Cognitive Analysis
3. Bio Informatics

### Professional Elective-III

1. Image Processing using Python
2. Applications of MATLAB

### Professional Elective-IV

1. Reinforcement Learning
2. Cloud Computing
3. Robot Kinematics and Dynamics

### Open Elective-III

1. Research Paper Writing
2. Advanced Embedded Programming
3. AI Speech Processing

## 8<sup>th</sup> Semester

- Professional Elective – VI
- Professional Elective – VII
- Project Phase – II
- Seminar
- Moocs /Swayam (Online Course)

### Professional Elective-VI

1. Randomized Algorithms
2. Applied Time Series Analysis
3. AI in Healthcare
4. Algorithm for Intelligent Systems and Robotics

### Professional Elective-VII

1. Natural Language Processing
2. Big Data Analysis
3. Cybercrime Forensics and Digital Forensics

# V. Conclusions

- As an Artificial Intelligence aspirant, you have **ample of job opportunities** in this field.
- Artificial intelligence will transform the global economy, and **AI jobs are in high demand**.
- According to International Data Corporation (IDC), **the number of AI jobs is expected to globally grow 16 percent this year**.
- AI careers are future-proof, meaning they are **likely to survive well into the future**.
- Getting an **education in AI** is challenging and requires persistence and personal initiative.

**THANK YOU**
