## **BASAVESHWAR ENGINEERING COLLEGE**

*(Government Aided Institution and Permanently Affiliated to Visvesvaraya Technological University Belagavi & Accredited by NAAC with 'A' grade from 2017-2022)*

**S. Nijalingappa, Vidyanagar**

**BAGALKOTE -587102, Karnataka, India**

## Research Policy

Research and development has emerged as one of the major performance indicators of higher education institutions. The research is one of the major components of academics which help the institutions to create interest in learning the basic concepts and their applications to provide solutions to real life problems especially in technical institutions. High quality research enhances the visibility of the college at national/International level and is an inherent aspect of teaching-learning process leading to knowledge driven inquisitiveness. The research policy document presents broad principles and guidelines for promotion of research activities in the college.

### 1. Purpose:

Basaveshwar Engineering College has framed Research Policy for conduction and management of various research related activities to create conducive atmosphere for basic and applied research and also to foster innovative thinking and creativity in students. The policy guides to promote research activities in various multidisciplinary areas and also provide need based solutions to the local community.

### 2. Scope:

The policy is applicable to all the faculty, students, and research scholars in all the departments and research centres of the college.

### 3. Custodians:

The research policy is framed to uphold the ethics and integrity in research. The Dean (Research & Development) oversees the activities with the support of various committees under the Chairmanship of Principal. The Research policy is reviewed by research advisory committee from time to time to advise and assist in research related work.

### 4. Objectives:

- To promote research and inculcate research culture
- To increase the number of publications in peer reviewed journals and enhance the quality of research
- To fetch financial support from various funding agencies
- To promote inter, intra and multi-disciplinary research activities
- To create awareness to take up surveys and identify the research problems
- To establish research centres and centre of excellences in thrust areas
- To promote collaborative research work with Industry and academia
- To encourage and facilitate research collaboration with international and institutes of national importance
- To strengthen and streamline management of research in the college

(Estd. : 1963)

### 5. Research Policy and Guidelines:

- The college has well defined parameters to identify quality and integrity of research
- To encourage basic and applied research in all disciplines and thrust areas
- To identify research areas of academic, social and practical relevance and provide need based solutions
- To establish linkages/MoUs with industries and business organisations
- To provide adequate support to faculty members with PhD to apply for funded research projects
- To take up collaborative research work with international institutions and institutes of national importance resulting in joint publications
- To motivate faculty members and students to be members of Professional bodies and establish student chapters
- To encourage faculty/students to participate and present papers in conferences
- To offer Interdisciplinary projects for UG/PG students
- Faculty from science departments are encouraged to guide the engineering projects
- To provide better infrastructure and conducive environment for research
- To consider research contributions as a criteria for recruitment and promotion of faculty members
- To consider demonstrated quality research parameter in Academic Performance Index (API)
- The Research and development in the college is supported and monitored by Dean (R&D) through various committees under the chairmanship of Principal
